2	Cosmo Specialty Chemicals launches hydrophilic block silicone emulsion for textile industry	<p>Cosmo Specialty Chemicals launches hydrophilic block silicone emulsion for textile industry</p> <p>Cosmo Specialty Chemicals, a 100% subsidiary of Cosmo Films Ltd, has developed a hydrophilic block silicone emulsion that exhibits better softening properties because of their lower rotational free energy than C-O bonds as compared with any other traditional non-silicone softeners. Mr. Anil Gaikwad, Business Head, Cosmo Specialty Chemicals said, "We have developed low-cost two sets of products (<i>Lysol BHL 1E, Lysol BHL 3I</i>) of block silicone softener. Very few doses of application are required which imparts good absorbency, durable soft feel and non-yellowing etc."</p> <p>The non-toxic and eco-friendly agent is suitable for a wide range of applications while providing an "out-standing effect" in the textile industry, the company claimed. "With remarkable lubricity and hydrophilicity, the innovative softener improves water absorbency and smoothness of the fabric along with improving the efficiency of cutting and sewing in," it added.</p>	Chemical Weekly	November 2021	119
